Government has three primary functions. It should [1] provide for military defense of the nation. It should [2] enforce contract between individuals. It [3] should protect citizens from crimes against themselves or their property.

When government, in pursuit of good intentions tries to rearrange the economy, legislate morality, or help special interests, the costs come in inefficiency, lack of motivation, and loss of freedom.

Government should be a referee, not an active player.”

–Milton Friedman

I found this on numerous blogs. There is an amazing amount of truth behind this heartfelt meme. Come to your own conclusions regarding it. We are at a crossroads.

I have a question for American patriots.

We know what we have seen so far. We can all see the crimes. A blind man can see this with a wooden stick. It appears that the previous administration weaponized the FBI, shielded a favored candidate from criminal prosecution, abused the FISA court to spy on an opposition candidate, and deliberately worked to subvert the 2016 Presidential election.

This is astonishing. This makes Watergate, Monica Lewinsky, Teapot Dome, and Iran/Contra look like Romper Room. This was nothing short of an attempted coup, and if you believe rumors and rumblings, the FISA memo is just "the tip of the iceberg". People are talking about sweeping hearings, numerous convictions, and many, many people going to jail.

Except that we've heard that before. We've heard it for years, time and time again, but it never seems to happen. So here's the question:

What if, just like always, **NOTHING** happens? Just like Fast and Furious, just like Lois Lerner and John Koskinen at the IRS, just like the NSA spying on James Rosen and Sharyl Attkisson, just like Benghazi, just like Hillary's unsecured email server and deletion of subpoenaed emails, just like classified data on Weiner's laptop, just like pallets of cash shrink-wrapped and flown to Iran, and just like the Democrat primary being rigged... what if **NOTHING** happens?

Sure, some low-level flunkies or rogue agents in Cincinnati might do a year or two in Club Fed, some others will get reassigned or take early retirement and enjoy thirty years of fat taxpayer pensions with their grandkids, but nothing more...

And the elites and the oligarchs and the political class prove once again that they are just too big to jail.

Just. Like. Always.

What then?

I suppose the question that I am really asking, on behalf of my seven year old daughter, is where is the line?

What happens if nothing happens?

The line. Where are we as a nation. Have we had enough yet? According to those in Washington D.C. and the News Media, it's still same-old same-old. They are still using the same old play book. They are still doing the same nonsense over and over. What now?

When is the time to seize our government back? Or do we just sit by and continue to take it?

Soldiers and armed civilians occupy the office of ousted Romanian leader Nicolae Ceausescu in the capital Bucharest on Dec. 26, 1989, the day after he was executed.

What is it?

Are you ready to have things go really bad against you and your family? Already Mad Maxine is already mobilizing her troops of brown shirts and they are following her instructions. We are at a crossroads.

We are at a Crossroads

We are at a crossroads. We either accept the situation or we respond back. I really hate to say it, but the radical left will not back down. Those in power will not risk their cushy salaries. Those who control the power and the United States will not take any risks. They believe that they can continue to do what they always have and you, the people, will continue to accept it.

It is black and white and there is no allowance for fence sitting.

The Hungarian Revolution in 1989 took place against the dictator there. The people were tired of the non-stop surveillance, the high taxes, and the myriad rules and regulations that prevented any type of freedom.

My Advice

I am an old man. The government crossed the line back when Bill Clinton was in office. I took it, but hoped that the endless wars, the endless taxes, and the endless regulation would end. It didn't. It only got worse under George Bush, and impossible under Obama.

So I left the United States. I retired on greener pastures.

I moved out. I had enough, and moved to a place that I assumed that I would never go. Today, I am in a much freer country. I live in communist China. *COMMUNIST* China, of all friggin' places!

Let me tell you the truth. It is nothing like I thought it was, and is refreshingly nice. The regulation is much, much less. The personal liberties and freedoms are astounding! The taxes are low, and the weather is nice. It's just fine for me.

Who would figure? It's nothing like I expected. I was expecting something else...

But, enough about me. Let's talk about America today...

The DHS is well armed with military grade vehicles, and armor. They are trained to fight on American soil. The Obama administration has been setting up the stages for an armed conflict of Americans against Americans for years.

To stand up to the all-powerful United States government is risky. You could lose everything, including your lives. You could lose your families. You could be maimed horribly. It will not end up well. So, be careful.

| I DO NOT advocate armed rebellion.

I do not advocate armed rebellion. However, I suggest that you stockpile, train and become less dependent on the government. Learn to get by. Purchase a bicycle. Have a garden, and start raising chickens in a hidden area. Stock a pond with fish. Know who your neighbors are. Get solar panels and have a wind generator. Arm up. You don't need to have every gun available. You only need one, but be well trained to use it properly. When in doubt, get a shotgun.

Learn to live without a cellphone. Stop carrying it around with you.

People, listen up! America is a police state. It really and actually is. Once you leave the United States you actually see how much it has become a big nasty police state.

Make a secret and hidden secure room in your basement. I learned this from Heinz, who emigrated to the USA from Nazi Germany and ran away with nothing after the Russians invaded. Make sure you have some books to reference in case the internet goes down, or worse yet, the internet is monitored and you fall under an NSA drag line.

If history tells us anything, it is that things will get worse before they get better.

Hopefully you will never need to use the gun, or any of your supplies. However, it doesn't hurt to take precautions. Take precautions. Train your family. Stay away from crowds. Be aware of the area around you. Be prepared to live when the police will no longer respond to you dialing 9-11.

The Constitution clearly forbids stationing troops on American soil, as they could be used against American citizens. But it doesn't matter. The government did it anyways. Only instead of calling it an army, they call it the DHS.

Equipment

President Obama made sure that the DHS was well quipped and sufficiently armed against American citizens. He has stocked the necessary military grade weapons, and made sure that the DHS could identify any “home grown” elements of “patriots” or anyone who would be a threat to the implementation of a progressive liberal agenda.

Know how formidable the military is that is stationed in your city.

American military vehicles deployed on American soil in defiance of the US Constitution. All vehicles were deployed under direction and orders from President Obama. These vehicles are fully equipped for military grade weapons and counter measures. If George Washington saw this he would be rolling in his grave.

The Ugly Reality

When tyranny forms in a nation, there are only two outcomes. Either [1] the tyranny is permitted to continue and fester, or [2] there is a movement that topple the government and replace it with something else.

It is my personal belief that the progressive left is counting and banking on a populist uprising. They [actually believe](#) that the [military is more liberal](#) than it let's on and will support progressive causes. They are emboldened by the [proud communists](#) and [BLM](#) that have graduated from West Point in the last few years. They [believe](#) that they will have

control of key elements of the military just like they have control of the key elements of the DHS, CIA, NSA, FBI and ICE.

They do so in the [belief](#) that they will be able to use that uprising to destroy the United States Constitution and replace it with a progressive socialist democracy along the lines of a strict communist government.

You don't have to believe me. Just visit any of the websites that the left uses. This is obviously their preferred outcome. However, I dare say that it will not go as anyone thinks. It will go badly.

Badly for everyone.

During the popular uprising in Hungary in 1989, the scene was horrific. Who knows the ugliness that happened to the various members of the factions that supported the dictatorship. It was not pretty.

No it is not pretty.

Crossroads

Yes, the nation is at a crossroads. I am in my "lifeboat". I am fine, safe and sound. But what about you? What are you going to do when Mad Maxine orders her followers to start burning down houses, shooting up schools and putting poison in Starbucks coffee? What are you going to do?

Because, I'll tell you what... The DOJ won't do anything. Led by Jeff Sessions, it is completely and absolutely useless.

The FBI won't do a thing, except run interference to support the followers of a hyper-progressive agenda.

The NSA will withhold information, and collect information to support the progressive ideals set in motion.

The FCC will block internet communication from non-progressive outlets and directly censor information.

So what are you going to do? Let sleeping dogs lie?

When the world gets even crazier, what are you going to do? Are you going to let sleeping dogs lie?
